Profile

 I am a professional Backend developer, where I have extensive experience in developing web applications using the Laravel framework. I have designed and developed complex systems and efficient databases using PHP and Laravel, enabling me to provide advanced and effective technical solutions. Additionally, I have strong experience in Frontend development, where I can convert designs into dynamic and attractive user interfaces using HTML, CSS, and JavaScript. Furthermore, I have experience with GitHub, allowing me to work effectively with teams and manage application versions proficiently.
